Yasser Hegazy

Software Engineer | Applied AI Engineer

Gaza Strip - Palestine | +970 567777368 | yasseranahegazy@gmail.com | LinkedIn | Github | Portfolio

PROFILE

Computer Engineering graduate from the Islamic University of Gaza with First Class Honours **(92.54/100)**, **ranked 4th in the department**. AI and backend-focused software engineer with hands-on experience designing, building, and deploying production AI platforms, intelligent backend systems, and distributed applications. Skilled in large language models, multi-agent systems, retrieval-augmented generation (RAG), and scalable software architectures, with a strong interest in trustworthy and reliable AI. Experienced in leading technical projects, taking products from initial architecture to deployment, and collaborating with multidisciplinary teams. Committed to advancing AI systems that are accurate, efficient, verifiable, and capable of addressing real-world challenges.

EDUCATION

Islamic University of Gaza — **Gaza Strip, Palestine**
Bachelor's Degree in Computer Engineering — ***Sep 2021 - Mar 2026***

- Honors: Ranked 4th in my department
- GPA: 92.54/100
- Graduation Project: BridgeAI: multi-agent AI platform for automated requirements engineering (LangGraph, LangChain, FastAPI, ChromaDB, RAG, WebSocket streaming, Next.js)
- Focus Areas: **AI & Data Science, Software Engineering & Scalable Computing, Embedded Systems**
- 250 hours of practical industry training (certified) | 60 hours certified volunteer work.

Yafa High Secondary School — **Gaza Strip, Palestine**
General Secondary Education Certificate — Scientific Stream — ***2020 - 2021***

- GPA: 98.6

PROFESSIONAL EXPERIENCE

Islamic University of Gaza — **Gaza Strip, Palestine**
Teaching Assistant — Computer Engineering — **Sep 2026 – Present**

- Teach undergraduate students in **Assembly Language and Computer & Network Security**, explaining key concepts, guiding lab exercises, and connecting theory to practical applications.
- Mentor students through coursework and technical challenges, adapting explanations to different skill levels and encouraging independent problem-solving and practical understanding.
- **Collaborate with faculty to prepare lab activities and teaching materials**, **assist students during practical sessions**, and support the Computer Engineering department's academic work.

Alif Venture Studio — **Palestine - Remote**
AI Engineer - Remote — **June 2026 – Sep 2026**

- Led **end-to-end development of WAKIB.ai**, a bilingual AI intelligence platform, from architecture to production, scaling it to **~500 daily users** with minimal editorial overhead and streamlined automated content publishing.
- Designed **multi-agent AI pipelines** with semantic clustering, evidence selection, automated validation, and **human-in-the-loop review**, improving content reliability while reducing LLM costs and manual work.
- Built **resilient AI infrastructure** using durable queues, retries, monitoring, and alerts; optimized performance and CI/CD workflows, reducing **image storage by ~93%** and improving production reliability.

Approved Technologies W.L.L — **Gaza Strip, Palestine**
Software Engineer Intern - Hybrid (Part Time) — **Oct 2025 – May 2026**

- Owned **core backend modules** in a **Laravel SaaS platform**, introducing **structured validation**, **unified API responses**, and **systematic edge-case handling** to improve **API reliability** and reduce production issues.
- Strengthened **engineering quality** through **TDD**, **API testing**, and **code reviews**, expanding **automated test coverage** for new features while reducing **regression risks** and repetitive debugging.
- Collaborated with **senior engineers** and **cross-functional teams** to stabilize **Laravel backend services**, maintain production reliability, and support continuous feature delivery.

TAQAT **Gaza Strip, Palestine**
Software Engineer Intern - Your Clinic SaaS project **Aug 2025 – Jan 2026**

- **Led backend development** of a **healthcare SaaS platform** for Gaza clinics, coordinating a **4-member team**, assigning tasks, guiding **technical decisions**, and delivering on schedule under **senior engineering mentorship**.
- **Developed secure Laravel and MySQL APIs to digitize clinic workflows, including appointments, patient records, billing, administration, validation, and role-based access control.**
- Designed and optimized **backend architecture** for **multi-tenant clinic operations**, ensuring **data isolation**, efficient database interactions, and consistent handling of healthcare records.

Technical Skills

- **Programming Languages:** Python, PHP, Java, JavaScript/TypeScript, SQL
- **AI & Machine Learning:** Large Language Models (LLMs), Multi-Agent Systems, Retrieval-Augmented Generation (RAG), LangGraph, LangChain, ChromaDB
- **Backend & Software Engineering:** FastAPI, Django REST Framework, Laravel, RESTful APIs, WebSockets, Asynchronous Processing, Software Architecture
- **Data & Infrastructure:** PostgreSQL, MySQL, Redis, Docker, CI/CD, Linux, Git/GitHub
- **Security & Software Quality:** Authentication & Authorization, Role-Based Access Control (RBAC), API Security, Automated Testing, Test-Driven Development (TDD)

Major Projects

BridgeAI – AI-Native Requirements Engineering Platform **Gaza Strip, Palestine**
Graduation Project Team Lead & AI/Backend Engineer **Sep 2025 – Feb 2026**

- Built a **multi-agent AI platform** that transforms natural-language conversations into structured **Client Requirements Specification documents** through automated reasoning and requirements analysis workflows.
- Engineered a modular FastAPI backend with WebSocket streaming, concurrency optimization, and structured task queues to support scalable orchestration of specialized AI agents.
- Developed LangGraph and LangChain workflows for intent extraction, ambiguity resolution, and dynamic templating, integrating ChromaDB for semantic retrieval, traceability, and iterative document management.

NoBound Hires – Employer of Record (EOR) Platform **Palestine**
Software Engineer | Alif Venture Studio **July 2026 – Sep 2026**

- Contributed to building NoBound Hires, an Employer of Record (EOR) platform designed to help international companies hire Palestinian professionals without establishing local legal entities.
- Helped develop **end-to-end hiring and payroll workflows**, including **bilingual contracts, e-signatures, employee onboarding, and wallet-based payments**, designed to streamline cross-border employment administration.

LEADERSHIP & ENGAGEMENT

- **Reach Education Fund | Volunteer (60+ hours):** Supported educational initiatives, student engagement, and activities promoting access to learning opportunities.
- **Talent Acceleration Program (TAP) | Participant:** Completed professional development activities covering technical skills, teamwork, communication, and career readiness.
- **IEEE, Islamic University of Gaza | Member:** Participated in technical workshops, engineering activities, and student community events.

Certifications

- Machine Learning with Python – IBM (Coursera)
- Developing AI Applications with Python and Flask - IBM (Coursera)
- Python for Data Science, AI & Development - IBM (Coursera)
- Laravel & PHP Mastery – Udemy
- Django REST API Bootcamp – Udemy
- Python & Django Web Development – Udemy
- Introduction to Software Engineering – IBM (Coursera)

RESEARCH INTERESTS

- Trustworthy AI, Large Language Models, Multi-Agent Systems, AI Evaluation, Applied Machine Learning, Arabic-Language AI.
